

1. Recognize common symptoms

Blank staring

Chewing

Fumbling

Wandering

Shaking

Confused speech

2. Follow first aid steps

Don't grab hold

Explain to others

Block hazards

Speak calmly

Track time, remain nearby...

...until seizure ends

People who've had this type of seizure should be fully conscious and aware before being left on their own. Make sure they know the date, where they are, where they're going next. Confusion may last longer than the seizure itself and may be hazardous. If full awareness does not return, call for medical assistance.
